July 1st is GST day -the day the GST becomes a reality for millions of Australians. This tax will reduce the average worker's living expenses dramatically, as similar taxes overseas have already done. The "tax breaks" provided to ease the impact of the GST will provide little relief, many of these having already disappeared though tax bracket creep etc. Combined with the huge tax breaks corporate interests will receive, the GST is effectively about transferring wealth from the workers to the rich.

Think this is unfair? So do we!!!!

Join us in opposing this regressive tax, and the rotten system that creates it.
