FRED PREFERS FISH FINGERS

Last week Councillor Fred Farrell who represents Windsor ward on the Prahran Council announced that he will no longer eat the banquet provided for councillors at the Prahran Council's fortnightly meetings .

Fred Farrell said that the banquet, which is supplied out of council funds, consisted of a four course meal starting with a dozen oysters in the shell and finishing with drinks. He estimated the cost of the banquet at £100 per fortnight.

Fred's campaign against misuse of council funds in a municipality largely composed of migrants, workers and pensioners has not been confined to the comparatively trivial issue of the council plutocrats providing themselves with free food and grog. Fred stood on a radical pensioners ticket in the council elections last year and with the support of pensioners and the Greek community managed to defeat the usual gaggle of estate agents and merchants.

Fred has plans to expose the deep - seated corruption in the Prahran council, and soon hopes to have details about amounts of money changing hands in relation to the building of service stations in Prahran.

NECROPOLIS

The viewing public must not be led,
Its most civil servant said,
Into the expectation

That upon their expiration
Occasioned by biological assault,
That there will be coffins for all

We are however, pleased to announce

That a new process enables us (cont.)

To compress a fully grown corpse
Into a pre-stressed brick, useful and odourless;
While your child will be crushed
Into a crucifix.

TOWARDS A FREE, "FREE WORLD"

Last weeks HERALD featured a report straight from '1984', or so it would seem. The report concerned two South Africans who are facing charges "Miscegenation", i.e., they have contravened the "immorality act" by cohabiting with a person whose skin is not of a colour approved by the white-supremacist government of that fair land.

South Africa is one of a number of police - states within the free world alliance, headed by of course, our great and powerful ally the U.S., others include such bastions of freedom as Spain, Portugal, Formosa, the South American dictatorships and Greece.

In Greece, political prisoners are being herded into concentration camps where many have been systematically tortured under interrogation.

Here are two horrifying manifestations of the capitalist system in action, a system in which the masses are suppressed by economic deprivation while the ruling classes live in affluence.

MUNDAE PERINT

Monday PRINT editor received many compliments for his spelling in last weeks issue, for this he thanks his concerned readers. Today's issue was prepared under the influence of alcohol and with the assistance of an educated typist forced on the said editor by Labor Club bureaucrats.

\$

IN THE CLASSIFIED PAGES OF PRINT (I C P O P)

Revolutionary Socialists discussion TONIGHT at the Bakery, 120 Greville St. Prahran. John Playford will lead a discussion on the interchange of business and government personnel and of Neo - capitalism in Australia in general. 8 pm. All welcome.
